

How many?

Four bowls
Eight yolks
How many
whites?

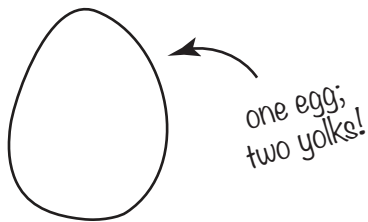

Do you just know that four
twos is eight? What if you
were unsure for just a
moment?
HOW COULD YOU CHECK?
(and does this question even make any sense?)

Did you count them
one by one?

How do you
KNOW there are
eight yolks
though?

cut along the solid line and fold along the dotted lines to make a book

It's probably eight
eggs, but what if
one of them was
double-yolked?

one egg;
two yolks!

Now how many?

What if TWO of them
were double-yolked?

How many
possibilities
are there?

How many yolks are in a dozen
eggs?

If some or all have double
yolks, how many MIGHT there
be?
